106	Walkability and bike-ability (family friendly! Bike lanes that share a road space with vehicles are useless for people trying to ride with children. Wide, multi-use sidewalks set back from the road are needed. I live within 2 miles of every place I would like to go on a weekly basis, but have to take my car due to safety concerns. Parking and traffic issues could be alleviated by prioritizing safe walkways and bike ways. I would also visit small businesses in Old Town more if I could walk or bike there. I don't have anyplace there that I care to drive to except occasionally. But if our family could take a pleasant walk to the ice cream shop or to Geek Out, we would probably go several times a week. As it stands now, we have to use our limited evening time wisely, and if choosing between a walk and a shopping excursion, a walk wins out 9 times out of 10.	5/6/2024 7:09 PM

114	1. City-Wide accessible/universal design for public parks, buildings, and events. 2. Bringing in new and needed businesses, restaurants and entertainment. 3. Increase Police Department budget and Officer Numbers.	5/6/2024 6:02 PM
115	More parking in Old Town (within walking 5 minutes with kids to get to a restaurant).	5/6/2024 6:02 PM
116	The flooding seems to be a major issue. Especially after the rains yesterday. Same with how fast and dangerous people are driving on the roads. I see more people running red lights in Burleson than I do in other places. We also need more sidewalks! I have to walk in the road when I go for walks the majority of neighborhoods and people drive so fast in the residential areas. The city needs to be more bike and pedestrian friendly. But also taxes are very high so it's a difficult decision to get services covered but also keep the taxes low.	5/6/2024 6:00 PM
